

DESCRIPTION

A locally fabricated solution, the Shapeair lightweight ductwork provides excellent thermal properties in a lighter and aesthetically pleasing solution.

Advantages include:

- no fibres released / dispersion
- resistant to high pressure of the air (positive and negative)
- excellent air tightness
- moisture resistance
- range of connection options
- higher R-ratings at a smaller footprint
- suitability for high humidity environments
- resistant to salty atmosphere
- easy access for maintenance
- easy cleaning (water washing, brushing or disinfection)
- approximately 80% lighter (compared to traditional duct)
- seismic tested
- faster installation
- available up to 4m single piece lengths

APPLICATIONS

- Hospitals
- Operating suites
- Clean rooms
- Pharmaceutical
- Food industry
- Shopping centres
- Swimming pools

CONSTRUCTION

Manufactured from aluminium foil-faced light weight panel tested to AS/NZS 1530.3:1999.
