

DESCRIPTION

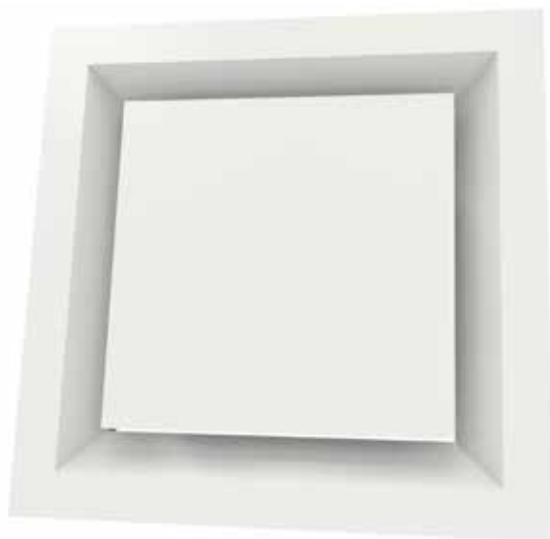

The CDP square plaque diffuser, is ideal in most commercial projects requiring high quality diffusers for integration with a variety of ceiling types.

Specifically designed to satisfy engineering criteria as well as architectural requirements, the clean face plaque design blends beautifully with any decor.

The diffuser is available in a wide variety of core styles as a 4, 3, 2 or 1 way pattern and offers great diffusion of air suitable to the type of surroundings.

The CDP square ceiling diffusers are designed to achieve an even supply air distribution from any type of ceiling.

The range is available with 2 frame styles to cater to various mounting conditions Lay-in T-bar (CDLP) and Bevelled Edge (CDBP).

CDLP MODEL SHOWN

CONSTRUCTION

Constructed from aluminium alloy extrusions with mitred corners, making the CDP range lightweight yet strong and durable. Front and rear inner capped with sheet steel.

MODEL: CDLP

ACCESSORIES

The diffuser in most common use is the square shape 4 way blow, therefore the diffuser can also be provided with internal blanking plates to achieve 1, 2 or 3 way blow to suit the individual requirements.

OTHER MODELS

Bevel frame.
