

DESCRIPTION

The ECSR angled egg crate grilles are generally used in return air, exhaust air, transfer air and/or natural ventilation applications.

The sight resistant design effectively blocks view of objects in walls and ceilings.

With no additional accessories needed, this saves both time and money.

CONSTRUCTION

The frame is of extruded aluminium with the aluminium core being an angled square pattern lattice.

Standard finish is white satin (other finishes available upon request).

ACCESSORIES

Available with opposed blade dampers, square adaptors, round adaptors and both plain and insulated header boxes.

OTHER MODELS

Round, loose core, hinged core, hinged core with filter, removable core, removable core with filter and Lay-in model to suit T-bar ceilings.
