

DESCRIPTION

The BP blanking plates are designed to suit standard type lay in diffusers.

Blanking plates are able to blank off one or more sides of a diffuser to allow for the air distribution pattern to be as per design requirements, while maintaining a consistent and aesthetically pleasing appearing throughout the project.

Also available are capping plates, which are designed to suit any type of register, diffuser or grille and manufactured to project requirements.

CONSTRUCTION

The BP blanking plates are manufactured from zincanneal and black matt in finish.
